Answer : [A]

(17) What is part of a database that holds only one type of information?

- [A] Report
- [B] Field
- [C] Record
- [D] File

Answer : [B]

(18) After the first photons of light are produced, which process is responsible for amplification of the light?

- [A] Blackbody radiation
- [B] Stimulated emission
- [C] Planck's radiation
- [D] Einstein oscillation

Answer : [B]

Explanation: The word "laser" is actually an acronym for light amplification by stimulated emission of radiation. Atoms or molecules of the active medium that have been excited to a higher energy level are stimulated by a passing photon to relax to a lower energy level and emit a photon that is indistinguishable from the passing photon, thereby increasing the number of photons like the incident one.

(19) "FET" is a type of transistor, Its full name is _____ Effect Transistor...?

- [A] Field
- [B] Factor

[C] Flash

[D] Force

Answer : [A]

Explanation: The terminals of FETs are called gate, drain and source. You might be more familiar with bipolar junction transistors (BJTs), which have terminals called base, collector and emitter. FETs were conceptualized first, but BJTs were easier to produce and so developed sooner.
